TASMANIAN TIGER – LONGSTANDING SUCCESSFUL DEPLOYMENT

Our soldiers' equipment has to meet extremely high demands, especially with urban operations becoming ever more significant. Accordingly, users require high-performance gear that effectively contributes to fulfilling the tasks at hand. At TASMANIAN TIGER we are well aware of this fact, which is why we only manufacture high quality and totally reliable products. Our comprehensive development focuses on the needs of our customers and draws support from numerous practical experience reports. TASMANIAN TIGER products will not let you down – we supply a wide range of military gear and also manufacture equipment for the police.

In recent years, TASMANIAN TIGER has primarily made its name producing rucksacks for a broad range of applications. Mature carrier systems, specifically developed for heavy loads (X1 system) or force-fit carrying during movement-intensive deployment (X Lite Vario system), distinguish TASMANIAN TIGER rucksacks as ultimate high-end products. In the course of development, TASMANIAN TIGER benefits from its sister company **TATONKA**, one of the main suppliers of top quality rucksacks to the European outdoor market.

Constant development of first aid products is also an important concern for our company and based on troop requirements. The new R.U.F. Pack (rescue under fire) is a small and compact medic battle rucksack that can be equipped with a variety of modules and used quickly under deployment conditions thanks to its intelligent design. Enabling immediate first aid provision, the Base Medic Pouch is secured to the battle vest via a quickly detachable MOLLE system.

Our in-company development team works constantly in close contact with both product users and material suppliers. Material selection corresponds to the highest requirements in terms of functionality, durability and safety. Through continuous input from men and women in active service, the practical requirements of the products are optimally integrated during the development process. TASMANIAN TIGER products are developed in-house from the prototype stage to series maturity and are manufactured in our own production plants. This means that we can quickly intervene at any stage to modify or improve the product and consequently ensure that the highest possible standards of quality are met. All working processes, from material acquisition to manufacture and final inspection, are precisely defined by TASMANIAN TIGER and regularly checked according to international standards by independent inspecting authorities.

Each and every product undergoes a meticulous inspection prior to leaving production.

Each product also receives a unique serial number under which it is stored in our database.

In order that we may continue to offer our customers out-and-out excellent equipment in the future, TASMANIAN TIGER continuously strives to expand its range of products and optimise existing items.

TASMANIAN TIGER – the brand and the myth

The TASMANIAN TIGER, also known as the Thylacine or Tasmanian Wolf, was the largest carnivorous marsupial native to continental Australia. Roughly the size of a small wolf, the Tasmanian Tiger owes its name to its striped back, which served as camouflage. Although not a speedy animal, this persevering nocturnal hunter tracked its prey until it tired, before then attacking it. Armed with an exceptional set of teeth and jaws that could open up to 180 degrees, the Tasmanian Tiger was a merciless hunter.

The Tasmanian Tiger has been classed as extinct on the Australian mainland since the 1930's, the last of its kind having lived in Tasmania. In 1966, a large protected area was designated in the southwest of the island to provide the animals with a reserve in order to protect the species from extinction. Although to this day there have been no actual sightings of the Tasmanian Tiger, numerous people believe that it has managed to survive unseen in the reserve...

The myth illustrates the animal's special characteristics; it's will to survive, hunting instinct, superb camouflage, guile, strength and perseverance.

This moved us to give our products the name TASMANIAN TIGER – the myth lives on!
